

## Craft

### Make your own crown.

You will need: A paper plate or card, scissors, felt tips. (If you're using card you will also need a bowl or plate slightly bigger than your head.)

Step 1 – (If you have a paper plate skip to step 2) Draw around the plate and cut out

Step 2 – Fold your circle in half

Step 3 – Draw 3 lines, from the middle of the straight edge. One going straight up and the other 2 diagonally. The lines should be roughly 1.5cm from the curved edge.

Step 4 – Cut along the lines you have drawn. Make sure you don't go to the edge of the plate.

Step 5 – Unfold the plate and draw two more lines going along the crease made when you folded it. Cut along the lines, again stopping 1.5cm from the edge.

Step 6 – Lift and fold each triangle you have made.

Step 7 – Fold back down each triangle and then decorate. If you have stick on gems you could use those.

Step 8 – Refold the triangles and wear your crown.

In the Bible, Jesus tells a story about a king. The king was very rich and had lots of servants who worked for him. Occasionally he would lend the servants money. One day he decided to collect what he was owed.

One servant owed him 10,000 bags of gold! The servant had no hope of ever being able to pay the king back, so the king ordered that the servant, his family and everything he had be sold as repayment. The servant begged the king not to do this saying, "Please, give me more time, I will pay you back." The king thought about it and then did something amazing. He decided that the servant didn't need to repay him any of the money!

The servant then went out and saw another servant who owed him 100 silver coins. He grabbed the servant and demanded that they pay back the money immediately. "Give me time and I will pay you back," pleaded the other servant, "It's only 100 silver coins." But the first servant didn't listen and had the other servant put in prison.

When the king heard about this he was furious. He called in the servant and said, "I forgave you the huge amount you owed me, you should have forgiven the other servant the little he owed you." The king was so angry he then had the servant thrown into jail.

# Experiment

Make 2 identical paper aeroplanes. There are some instructions below for a simple plane, but you can use any design you like.

Once you have your two planes attach a coin to the wings of one of the planes and see which plane flies the furthest.

Step 1 – Fold the paper in half lengthways. Then unfold.

Step 2 – Fold the top corner on both sides to the crease line you made in the middle. Making 2 triangles.

Step 3 – Fold the paper from the outer edge of both triangles to the middle. Creating a sharp point on your plane.

Step 4 – Fold the paper outwards, along the central crease

Step 5 – Fold the diagonal edge on both sides back to the central crease

Step 6 – Adjust wings so they are level.

Christians believe that Jesus told this story to help us understand that, just like the king in the story, God forgives us when we come to him and say sorry, no matter how many times we get things wrong. Because God shows us such amazing love, we should be willing to forgive others when they upset us. Often, we find this very difficult to do but Christians believe that if you don't forgive you are like the aeroplane with the coin attached. The coin weighed down the plane so it couldn't fly properly, likewise if we don't forgive we can get so angry and upset it weighs us down. The good news is the Bible says God can help us show the love we need to be able to forgive.

This story can be found in Matthew 18 v 21-35 and read here,
